

53rd AGA - Entry Requirements Into The Republic of Indonesia (Update 12 September 2022)

9:39 AM (3 hours ago)

Keith Miller

to

Dear Participants,

There has been a great deal of confusion about what documentation or smart phone downloads are required to enter into Indonesia. Below you will find what we have been able to ascertain with assistance of our tour operator.

Visa

As reported in Membership Message 8/2022, the Government of the Republic of Indonesia has introduced a “Visa on Arrival (VOA) for Foreign Travellers” for citizens of many countries: <https://www.indonesia.travel/gb/en/news/latest-travel-regulations-to-enter-bali>. Further details can be found by clicking the following link: <https://kemlu.go.id/london/en/news/18631/visa-on-arrival-voa-for-foreign-travellers>.

Inoculation Against COVID-19

All international travellers (foreign nationals) who enter the territory of the Republic of Indonesia must show printed or digital proof that you have had at least two inoculations against COVID-19 and proof of a booster if they will be taking a domestic flight. The last inoculation or booster must have been completed at least 14 days prior to departure. The Government recognizes the following vaccinations, including but not limited to two-doses of Pfizer or Moderna or Sinovac, AstraZeneca and Sinopharm and single-dose of Johnson & Johnson.

The immigration officer will ask to see the printed or digital proof of the vaccination certificate and probably proof of an hotel booking and return airline ticket. There will be a check to inspect the visa (*most participants will have just obtained this on arrival*).

The PeduliLindungi app

The purpose of this app is to track and monitor people entering public areas in the country against the spread of COVID-19 virus. It is not a requirement to download the app to enter the country but it should be downloaded before arrival in Indonesia if possible. To download go to Google Play Store (Android) or App Store (iOS) and search for “PeduliLindungi” and install the app on your smart phone.

For those who do not have a smart phone, it will be necessary to carry the printed proof of your inoculations to show when entering public places.

Best regards,

Keith Miller
